Entered at the Post Office at Middletown, Del.,
as second-class matter

SATURDAY, MARCH 15, 1922

WHEN you consider the accomplishments of the Armaments conference, remember one thing—that its achievements are not to be measured by reductions in military expenditures only. Prior to the conference, all the nations were in competition for greater navies and armies. Our annual appropriations for military purposes were on the increase, and but for the conference, they would have continued to increase. The most that anyone hoped to accomplish at the conference was a check of the increase. In fact, the conference was officially referred to as a conference on "limitation of armaments." But under the Hughes proposals, much more was accomplished than anyone thought possible. There was not only a checking of increases but an agreement for decreases. Therefore, when you figure up the saving, you may properly add to the reduced military appropriations the sum that certainly would have been appropriated in excess of previous expenditures if the old practice of keen competition had been kept up.

ASSERTING that some public school histories have taught erroneous economic doctrines, an official of the American Federation of Labor declares that it is the purpose of the Federation to "undertake a constructive campaign to bring the true economic tendencies and principles to those attending our educational institutions." This spokesman for the Federation manifestly fails to understand the real criticism of many histories now in use. It is not the proper purpose of a history to teach economics. Many of our histories do teach free trade, socialism, and discontent, and they are criticized for that reason. But it would be just as great an error to have our histories teach protection or conduct a propaganda against socialism. The point is that a history is no place to undertake to teach economics. A history is intended to be a record of events, not an exposition of the economic theories of the author.

THAT conference in Chicago for the purpose of organizing all the radicals in an effort to either capture the primaries of the old parties or form a new party, was apparently made up of short-haired women and long-haired men—impracticals who have failed to make a favorable impression on the responsible members of any party or group. No successful movement can ever be started or conducted by that class of people. Not having ever been able to agree with anyone else, they will not be able to agree among themselves.

ICE BY ELECTRIC PROCESS
Method, Long Tried Out in Hotels, Restaurants, and Ships, Soon to Be Universal.

Now that iceless refrigeration has been simplified to the point where it is suitable for the home, it is safe to predict that it will not be long before it will be within the reach of even those of very modest pocket books, and all need of bothering with the iceman, with his pick and tongs, will be gone.

The ice used on our tables has long been the product of electric refrigeration, although the mechanism was not located in our own homes, says the Philadelphia North American. Hotels, restaurants and passenger boats have used the electric process because it is efficient, sanitary and convenient.

Electricity does not immediately and directly produce the freezing temperature, but merely provides the motive power to condense certain chemicals which are the actual refrigerants. In the process of condensation these chemicals vaporize or "boil" and absorb the heat from the surrounding air. The machinery by which condensation and vaporization is produced was formerly large and expensive, and it has taken continuous experimentation to reduce it to a point where it is practical for house hold use.

The process has been similar to the transition of locomotive power from the large and clumsy railroad steam engine to the smaller automobiles, with their comparatively simple mechanism. The complex machinery had to be refined to a point where it could be produced cheaply and operate on a small scale. Electric refrigeration has now almost reached the jitney class. It will soon be considered essential in all our kitchens.

Four Children in One Year. Four babies in one year have arrived at the home of Mr. and Mrs. M. N. Young of Abilene, Tex. A set of triplets and a single son are the quartette. The mother is thirty years old and now has ten children.

Kept Marriage Secret Eleven Years. After keeping their marriage a secret for 11 years, Sarah Howell and Tobias Hendershot of Vienna, N. J., have announced that they were married in 1910.

ADVERTISEMENT FOR BIDS

Sealed proposals will be received by the State Highway Department, at its office, Dover, Delaware, until 2 o'clock, P. M., March 29, 1922, and at that place and time publicly opened and read in the order here shown, for the construction of State and State Aid Highways, involving the following approximate quantities:

CONTRACT NO. 48, 0.504 MILES
Appoquinimink and Blackbird Hill
1,400 cu. yds. Excavation
940 tons Broken Slag Base Course
190 cu. yds. Cement Concrete Pavement
2,880 sq. yds. Penetration Macadam Surface

CONTRACT NO. CN-4, 5.225 MILES
Smyrna to Walker's School
15,000 cu. yds. Excavation
2,000 cu. yds. Borrow
200 tons Broken Stone Base Course
6,200 cu. yds. Cement Concrete Pavement
100 cu. yds. Class A Concrete
4,500 lbs. Reinforcement
350 lin. ft. 15 in. R. C. Pipe
30 lin. ft. 18 in. R. C. Pipe
120 lin. ft. 24 in. R. C. Pipe
30 lin. ft. 30 in. R. C. Pipe
30 lin. ft. 36 in. R. C. Pipe
140 lin. ft. Relaid Pipe, 18 in. and under
40 lin. ft. Relaid Pipe, more than 18 in.
340 lin. ft. Cable Guard Rail

CONTRACT NO. CK-2, 3.946 MILES
Harrington to Houston
12,200 cu. yds. Excavation
2,800 cu. yds. Borrow
200 tons Broken Stone Base Course
7,550 cu. yds. Cement Concrete Pavement
210 cu. yds. Class A Concrete
210 cu. yds. Class B Concrete
13,500 lbs. Reinforcement
600 lin. ft. 15 in. R. C. Pipe
160 lin. ft. 18 in. R. C. Pipe
30 lin. ft. 24 in. R. C. Pipe
100 lin. ft. Relaid Pipe, 18 in. and under
600 lin. ft. Cable Guard Rail
600 lin. ft. Timber Piling

CONTRACT NO. CK-6, 6.276 MILES
Persons to Dover
0.2 Acres Clearing and Grubbing
1.5 Acres Clearing
21,500 cu. yds. Excavation
2,700 cu. yds. Borrow
400 Tons Broken Stone Base Course
12,050 cu. yds. Cement Concrete Pavement
240 cu. yds. Class A Concrete
60 cu. yds. Class B Concrete
17,000 lbs. Reinforcement
600 lin. ft. 15 in. R. C. Pipe
200 lin. ft. 18 in. R. C. Pipe
84 lin. ft. 24 in. R. C. Pipe
56 lin. ft. 30 in. R. C. Pipe
30 lin. ft. 48 in. R. C. Pipe
300 lin. ft. Relaid Pipe, 18 in. and under
80 lin. ft. Relaid Pipe, more than 18 in.
1,000 lin. ft. Cable Guard Rail
500 lin. ft. Timber Piling

CONTRACT NO. CK-3, 4.09 MILES
Houston to Milford
11,200 cu. yds. Excavation
500 cu. yds. Borrow
220 tons Broken Stone Base Course
7,850 cu. yds. Cement Concrete Pavement
90 cu. yds. Class A Concrete
3,200 lbs. Reinforcement
600 lin. ft. 15 in. R. C. Pipe
100 lin. ft. 18 in. R. C. Pipe
60 lin. ft. 24 in. R. C. Pipe
100 lin. ft. Relaid Pipe, 18 in. and under

CONTRACT NO. CK-9, 6.23 MILES
Mardel to Parsons
1.9 Acres Clearing and Grubbing
26,000 cu. yds. Excavation
3,000 cu. yds. Borrow
300 tons Broken Stone Base Course
11,350 cu. yds. Cement Concrete Pavement
44 cu. yds. Class A Concrete
100 cu. yds. Class B Concrete
27,000 lbs. Reinforcement
17,500 lbs. Structural Steel
700 lin. ft. 15 in. R. C. Pipe
400 lin. ft. 18 in. R. C. Pipe
25 lin. ft. 24 in. R. C. Pipe
116 lin. ft. 30 in. R. C. Pipe
78 lin. ft. 36 in. R. C. Pipe
800 lin. ft. Cable Guard Rail
1,400 lin. ft. Timber Piling

Performance of contract shall commence within ten (10) days after execution of the contract and be completed during 1922.

Monthly payments will be made for 90 per cent of the construction completed each month.

Bidders must submit proposals upon forms provided by the Department.

Each proposal must be accompanied by a surety bond, certified check, or money to the amount of at least ten (10) per centum of the total amount of the proposal.

The envelope containing the proposal must be marked "Proposal for the Construction of State or State Aid Highways."

The contract will be awarded or rejected within twenty (20) days from the date of opening proposals.

The right is reserved to reject any or all bids.

Contractors will be shown over work after March 19.

Detailed plans may be seen after March 15th, and index plans and specifications may be obtained upon deposit of ten dollars (\$10.00) which amount will be refunded upon return of plans and specifications in good condition at the office of

STATE HIGHWAY DEPARTMENT,
Dover, Delaware.

A Good Tonic For Old People
Gude's Pepto-Mangan Restores Strength And Prevents Illness

Aged people often need a good blood tonic. When the blood becomes clogged with poisons from the system, Gude's Pepto-Mangan purifies it by driving off the waste matter. Good blood is full of vitality and prevents illness, giving the body greater power of resistance. The weaknesses of old age are greatly helped by a supply of rich, red blood. Gude's Pepto-Mangan is sold in liquid or tablet form by all druggists. It has been recommended by physicians for 30 years and is a valuable tonic and builder for the weak and run-down of all ages from childhood to old age. Advertise a trial when you have need.

Excellent Remedy for Constipation
It would be hard to find a better remedy for constipation than Chamberlain's Tablets. They are easy to take and mild and gentle in effect. Give them a trial when you have need.

Kept Marriage Secret Eleven Years. After keeping their marriage a secret for 11 years, Sarah Howell and Tobias Hendershot of Vienna, N. J., have announced that they were married in 1910.

Everyone who has used Chamberlain's Cough Remedy speaks well of it," writes Edward P. Miller, Abbottstown, Pa. People who once use this preparation are seldom satisfied with any other. It is excellent to allay a cough or break up a cold.

33 BULLS 5 HEIFERS

Will be sold at Public
Auction on
FRIDAY
MARCH 17

WINTERTHUR FARMS SECOND ANN
ALE OF REGISTERED OLTIN CTTL UAL

15 Bulls Ready For Light Service

2 are out of cows having made 34-lbs. of butter in 7 days.
1 is out of a cow having made 1000-lbs. of butter in a year.
7 are out of cows having made 20,000-lbs. of milk in a year.
9 are out of cows having made from 25 to 29-lbs. of butter in 7 days.
6 are out of cows having made from 900 to 971-lbs. of butter in a year.
8 are out of cows having made from 700 to 864-lbs. of butter in a year.

16 Are Sons of King of the Ormsbys

They are all by our herd sires: King of the Ormsbys, Sir Inka Prilly Segis, Johanna King Segis, King of the Sadie Vales, Sadie Vale King, Winterthur Bess Ormsby Boast, and Winterthur King Ormsby Accrue.

The bulls in this sale include some of the very best bred ones we have ever raised, and never before have we succeeded in getting together such a splendid lot of individuals. Every animal entered has been carefully selected first for type and size and second for the records back of him, and nearly all of them are out of yearly record dams. Our sale catalog will convince you that they are bred right.

As An Additional Attraction We Are Also Selling—

5 High Class Heifers

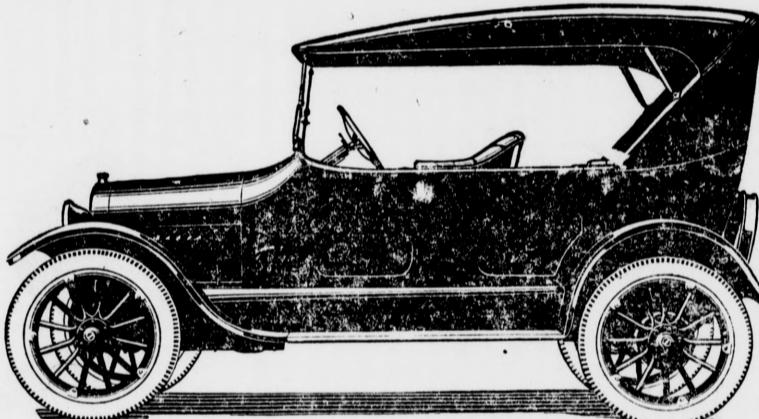

3 by a 40-lb. sire
1 by a 38-lb. sire
1 by a 30-lb. sire

Come and Buy Them at Your Own Price Approved Notes Accepted

CHEVROLET ANNOUNCES A COMPLETE STANDARD MOTOR CAR FOR \$525

In offering the Superior Chevrolet at \$525, its manufacturers call attention to certain features of construction, equipment and performance that are positively necessary to complete satisfaction.

Cars less complete, less standard, must now submit to direct comparison with the Superior Chevrolet, and stand or fall on price only.

Chevrolet uses less gasoline than any other car in its class. It uses less oil than any other car in its class.

Chevrolet is easy and safe to steer.

Chevrolet is more comfortable to ride in than any other low price car.

Chevrolet has a speedometer connected to the transmission.

Chevrolet has an oil gauge on the dash.

Chevrolet has a one man top with concealed bows. It has a gypsy style back curtain.

For there is no lower priced automobile in the world that has the qualities of Chevrolet. Pay less and you get less.

Check these superiorities—these absolute essentials to comfort and economy, and see whether they are not, each and every one of them, indispensable to a real, modern automobile.

Chevrolet has a standard transmission with three speeds forward and reverse.

Chevrolet has a water pump and does not depend upon thermo syphon circulation.

Chevrolet has roller bearings in front wheels.

Chevrolet has a steerable windshield. It has a steerable windshield glasses for summer comfort.

Chevrolet has the Willard Rubber Thread Battery.

Chevrolet has pockets in all four doors, including one beside the driver's seat.

Chevrolet has a standard gear shift lever.

Chevrolet has both a hand and a foot accelerator.

Chevrolet has National Headlight Lenses. It has a fine appearing body.

Chevrolet has a triple baked enamel body and fenders.

Chevrolet has a modern valve-in-head motor, noted for its great pulling power.

PEARL FISHING IN SCOTLAND

Low Water During the Season Just Ended Brought About Many Successful "Catches."

The pearl-fishing season, which has now drawn to a close, has for many of the Scotch fishers been an extremely successful one, says Violet Raeburn in the Edinburgh Scotsman. Owing to the low volume of water in the rivers after the long drought, they have been enabled to see more easily the shells on the river bed, also to wade farther into the water. These fresh water pearls are contained, not in oyster, but in pearl-mussel shells, which are to be found in several of the Scotch rivers and streams.

The methods of fishing vary slightly. The fisher with whose method we are most familiar wears an angler's hip boots and wades far into the water. He carries in his hand a piece of corrugated iron, shaped much the same as a jug, the base of which is made of glass. This enables him to see the shells which lie at the bottom of the river. In his other hand he holds a "tongs" consisting of two pieces of wood with iron pliers.

On seeing a shell he lifts it with tongs and puts it into his pocket. Then when he has a good number of shells he opens them on the river bank to discover if he has had any luck. It may be that he will find a pearl in the first one he opens, or he may open many shells without any prize. The same shell may contain more than one pearl.

As there is a mass of water weed at the bottom of the river which prevents the shell being seen, the spring, before the weed is in full growth, and the autumn, when it is dying down, are the best times for the fishing.

RESERVOIR SITES ALONG OHIO

Government Geologic Survey Points Out Enormous Possibilities for Impounding Stores of Water.

A comparison of records of the flow of the Ohio river with those of the upper Mississippi and Missouri shows that although its drainage area is but one-third that of the combined Mississippi and Missouri, its average and low-water flow is 1.3 times as great as their combined flow, and its maximum flow is 1.5 times as great. This fact is accounted for by the greater rainfall in the Ohio basin and by the general character of the region.

In the Ohio basin there are apparently many opportunities for storage, especially on the southern tributaries. On topographic maps of the geological survey that cover part of the drainage area of the Ohio a large number of reservoir sites have been located, some of them of enormous capacity, and it is believed that careful survey would show many sites suitable for dams that would impound large quantities of water in reservoirs.

The volume of water flowing in the Ohio may perhaps be better appreciated by noting that a discharge of 300,000 cubic feet per second would in one day cover 595,000 acres to a depth of one foot.

Alsace to Have Big Show.
The city of Strasbourg, in Alsace-Lorraine, is already making preparations for a great international health exposition to be held in commemoration of the centennial anniversary of the birth of Louis Pasteur, discoverer of the germ origin of diseases. Following the example of the Columbian World's Fair at Chicago, which celebrated in 1893 the four hundred and ninetieth anniversary of the discovery of America in 1492, the Strasbourg exposition will be held in 1923, from May to October, although Pasteur was born in 1822.

For the first time in history Strasbourg will see an exposition arranged by citizens of France. The participation of representatives from the nations that helped to bring Alsace-Lorraine back to France will make it memorable as something more than a collection of modern methods of fighting disease.

War Mascot Dead.

The French press pays tribute to a hero of the war, whose death has just been announced. The hero in question was named Diamond, and was a cat that attached himself to the French in the lines before Aisne. Every day Diamond might be seen threading its way through the entanglements to the German front trench. The poilus were afraid that some harm might come to their mascot, and in order to protect it they tied a packet of cigarettes around its neck before it started out on its daily ramble, bearing the words: "Bring you cigarettes, do not kill me!" Diamond, being a war veteran, had a right to a comfortable home when the armistice was signed, and was sent to an animal's home supervised by the Countess Yurkevich at Neuilly, where it died.

Motorcycle Spray.

A farmer's motorcycle came in useful this summer. He had 500 acres planted to potatoes, and these were threatened with destruction by the potato bug. With his horse-drawn sprayer he could only cover about 35 acres a day, and in the hot weather which prevailed this would have spelled ruin to his crop. But the rancher was a resourceful soul, and he attached an insecticide-spraying outfit to the sidecar chassis of his motorcycle, utilizing the power of the machine for traction and for spraying. With this outfit he found it possible to spray 100 acres per day with paris green and so save the situation.

Found a Cure for Indigestion

"I use Chamberlain's Stomach and Liver Tablets for indigestion and find they suit my case better than any dyspepsia remedy I have ever tried and I have used many different medicines. I am nearly fifty-one years of age and have suffered a great deal from indigestion. I can eat almost anything I want to, now," writes George W. Emory, Rock Mills, Ala. These tablets contain no pepsin but strengthen the stomach and enable it to digest the food naturally.

JERUSALEM FELL TO COOK HUNTING AN EGG

Mayor Hands Over Keys of City
After Turks Had Fled in
Night.

The story of the great Palestine egg hunt was told by Maj. Vivian Gilbert of London, in an address at the Brooklyn Y. M. C. A. recently.

Major Gilbert was a member of the Allenby expedition which fought its way into Palestine in 1917. "On the morning of December 9, 1917," the major said, "an orderly, who had been sent to a small village which we held for eggs, missed his way. He returned to report, in great perplexity, that 'the cove, surrounded by a crowd,' had given him some keys and made a speech when he asked for eggs."

"The 'cove' was the mayor of Jerusalem, who, deserted by the Turks, left the city the night before, and preceding the English forces to be descending on the city, had 'surrendered' by handing over the keys of the city to the first man he saw in British uniform.

"The brigadier general was informed," the major continued, "and going into Jerusalem, formally accepted the keys. But the division general decided that he was the fit person to capture Jerusalem and ordered the brigadier to return the keys. Some hours later the former, accompanied by a gorgeous retinue, accepted the keys from the mayor for the third time.

"But when the division general sent a telegram to General Allenby, the latter replied that he would take the city, and he did so two days later.

"The poor mayor died two weeks afterward—it was said that he contracted pneumonia from so much running around bareheaded."

The Moslem population was greatly mortified by the incident of the eggs, he added.

CINDER BLOCKS USED IN CONSTRUCTION OF HOUSE

Cinder blocks, the invention of Frank Cordery of New York, are being used in the construction of a \$100,000 residence in New Rochelle, New York. The blocks, made from ordinary coal cinders and chemicals, are from thirty to thirty-five per cent cheaper than ordinary brick or tile. They are non-conductors of heat and cold and have many other features not possessed by the ordinary brick. The press for the making of the cinder blocks is set up on the site of the building under construction. The blocks are turned out and are ready for use twenty-four hours after molding. The New Rochelle house, the first to be built of the new cinder blocks, will be two and one-half stories high and contain eighteen rooms.

The picture shows Frank Cordery, the inventor, driving a nail into one of the cinder blocks. Wood parts may be attached directly to the wall in this manner.

AMERICAN INDIANS MAY LEAVE

Osage Tribes Contemplate Settling in Mexico to Live as They Please.

More than 10,000 American Indians are contemplating establishing a colony in northern Mexico. The Indians are the Osage tribe, who have become wealthy through the discovery of oil on their lands.

"It is not the oil that is causing us to seek new lands," says Chief Washresha. "We have plenty of money and our oil royalties will continue for years. But it is not cash that makes happiness. We wish to go where we can live as we want to live, where we can farm, and raise strong children."

Will Marry Man Who Pays Dad's Bill.

Miss Rena Martine, nineteen years old, of Poteau, Okla., has advertised her willingness to marry any man who will pay off a \$4,000 debt of her father's.

Man 104, Saved \$48,900 as Farm Hand.
Alexander Dawson, one hundred and four years old, of Earlville, Ill., saved \$48,900 during his life on a farm as a laborer, according to his will making disposition of the estate.

Recipe for having food taste like that which mother used to make: Walk five miles before dinner.

It is easy to get everything you want, provided you first learn to do without the things you can not get.

He who undertakes to nail all the tiles that get into circulation will soon find himself running out of hardware.

Every time we see a horseshoe over the door we wonder if sometime they'll be hanging an auto tire there for good

Globe Sanitary Cut Price MEAT MARKET

Ingram Building, North Broad Street

MIDDLETOWN, DELAWARE

Lady—"Mr. Walls you certainly have showed me something new, the surprising difference between cow beef and Steer beef! Why didn't I learn that long ago? I'd stopped eating beefsteak, it was so tough but, now I enjoy your tender Steer beef, and am eating steak again. Nothing but Steer beef for me hereafter!"

Mr. W.—"Very true Madam—big difference between our Steer beef and Cow beef, A No. 1 in quality and can't be beat for price. Call again."

This Christmas and Next

Many of us strive by hard work and strict attention to business to support our families, ourselves, and our loved ones, and to save certain sums of money for the "rainy days."

Many of us also find the Christmas season at hand without the wherewithal to furnish our families and our friends with the gifts, remembrances, and pleasures, that we had hoped, or intended to give. We feel sorry—and yet, after all—we can but blame our own shortsightedness.

For an account in the Christmas Savings Club of this Bank would have insured just the kind of Christmas you wanted to have.

Letters in a Like Situation
Should Read This Letter
from Mrs. Enrico

Chicago, Illinois.—"I took Lydia E. Pinkham's Vegetable Compound for a cold. It was a trouble. I had tried doctors and all said the same—an operation. At first I only felt the pain on my left side, but later I seemed to feel it on both sides. I am a power sewing-machine operator and have a little girl to support. I work in a tailor shop and recently find them very slack this year and I am home part of the time. I do not like to take any medicine, so I consulted my friends, and one lady said, 'Take Lydia Pinkham's Vegetable Compound, so I did. I have felt better right away and am in good health now. I recommend your Vegetable Compound and Nutritive Wash to all.'—Mrs. MARY ENRICO, 469 N. Carpenter St., Chicago, Illinois.

Often the mother is obliged to support her children and good health is necessary. Lydia E. Pinkham's Vegetable Compound is just the medicine you can depend on. It is a medicine for the woman's ailments and the relief it brings to Mrs. Enrico it may bring to you. Keep well by taking Lydia E. Pinkham's Vegetable Compound.

Gains 21
Pounds
IN SHORT TIME
MASTIN'S
Vitamin Tablets

Now Used By Millions As A Natural, Quick and Easy Way To Help Increase Weight and Energy

So remarkable is the action of MASTIN'S VITAMIN TABLETS in helping to increase the nourishing, health-giving power of what you eat, that one woman recently gained 21 pounds after being thin and allig

oing. Weak, thin, run-down men and women everywhere—victims of under-nourishment—have found at the astonishing improvement in their health, weight, mental alertness and appearance after only a short course of MASTIN'S VITAMIN TABLETS.

MASTIN'S VITAMIN TABLETS contain all three vitamins, true orange juice, and necessary lime juice and other vital elements which Nature provides for perfect vigor of body and mind, and to build up that powerful resistance which helps to guard you against the germs of disease.

Only by making the test yourself can you realize how MASTIN'S VITAMIN TABLETS help to build and nourish the shrunken tissues, build up renewed nerve force, strengthen the entire digestive and assimilative system and help put on weight and strength as solid flesh in the places where it is most needed.

For your own safety and protection, always check substitution and adulteration insist upon MASTIN'S to get the original VITAMIN TABLETS guaranteed to give satisfaction and safety. At all good druggists, such as

Three-Piece Suits.
A style that is practical may be introduced and not take; it may come

ADVERTISE

Pastime Clothes Informal;
For Women of Affairs

MANY dresses in the spring display are frankly designed for a double purpose. If they are made of certain fabrics that are readily adapted to sports clothes, they are displayed in either the sports or tailored classes. The spirited tailored suit serves for sports wear and the somewhat subdued sports dress does duty as a tassel.

Fabrics and the colors have much to do with the case. Goods that may be classed as "informal" and colors unusual or "high" begin their careers in sports clothes and presently find them-

During the season just past the

Simple One-Piece Frock of Eponge.

selves among recognized members of the tailor-made set. It is all a matter of getting used to them. Among the spring materials that serve well in this double capacity, is sponge which designers no sooner see than they desire to use for making what may be called pastime clothes—informal but highly decorative. An example of this style appears here in a simple one-piece frock of sponge, very generously adorned with queen applique figures of smooth cloth in bright colors, fastened by means of fancy stitching about the edges. The design leads one to think it was done by a futurist artist who dreamed of

straight silhouette with smart, low waistline, indicated by a girdle or a bloused effect, has placed itself high in the regard of women and is destined to remain there for some time. Nevertheless, new arrivals in tailored frocks include many that indicate a return to the normal waistline and a broadening of the silhouette at the hips. Draped and "wrap around" styles in the skirt portions of these dresses strike a new note and panels, after long popularity, continue to show ingenious new developments.

A paneled dress appears at the right of the two pictured. The panels are cascaded and pointed, finished at the

IN SPORT CLOTHES

No Old Standards to Prevail; Are Made for Effect.

White Costumes Relieved by Very Bright Colors or Black Are Extremely Smart.

Sport clothes for either summer or winter offer more opportunity than any other costumes for a designer to give free rein to her imagination. This is, noted a fashion writer, because conventions are more or less banished when it comes to this type of dress. We have no old standards that we must hold to. They are in a way like stage clothes, made up chiefly for effect.

One could not very well indulge in a white dress set off by orange, green or flaming red for a walk along a city thoroughfare, but in the country or at the seashore all is different. There is everything in the way of background to set off the picturesque and the ethereal in costume. Here the best and the most feminine in dress finds its traditional setting.

Sportswomen of the old school may proclaim such statements as false and untruthful that sport clothes for the true sportswomen are today, as of yore,

Dress of White Crepe de Chine.

built for utility. This may be true to a very limited degree. In no other branch of dress does a woman give as much rein to her love for the purely picturesque and colorful as she does in costumes of this sort.

The points of most vital interest in

proceeding to plan summer clothes are the materials, styles and colors that will be used.

White costumes relieved by very bright colors or black are extremely smart, and many beautiful models of this sort have been brought out by Paris dressmakers.

SIMPLE ONE-PIECE DRESSES

Garment Developed From One Piece of Material, Cut to Fit Figure Easiest Possible Way.

It is interesting to see the continued prevalence of the little one-piece dresses made over the extremely simple lines that characterized them at introduction. Of course, observes a fashion authority, we have these of the elongated waists and skirts, with more fullness in the sleeves and in

the bodice front of gray cloth decorated with the dull steel, and there was a narrow girdle at the front formed of the steel.

Muffs.

The muffs preferred this season are

fabric and fur combinations, so that

they may be distinctly dressy.

Velvet Frocks.

A new black velvet frock recently noted was made on the long slim lines and trimmed with tarnished steel. The sleeves were wide at the wrist and were embroidered with the steel. There were side panels which fell below the lower edge of the skirt.

There was a narrow panel at the bodice front of gray cloth decorated with the dull steel, and there was a narrow girdle at the front formed of the steel.

Skirts at Winter Resorts

White Flannel Favored; Black Approved Color Contrast; Tucks Form Panel Effects.

"When the woman who goes to Palm Beach and the other winter resorts takes into consideration the white flannel skirt, she usually chooses one on very simple lines," says the buyer of one of the largest New York establishments. "Of course, they have novel embellishment, but she is almost always conservative in her tastes."

With this clientele in view they are showing now, and report a good business on models developed of white flannel, and in most cases when a contrasting color is used, it takes the form of black. She thinks very favorably of the continued vogue of black and white for winter resort and summer wear.

Bringing out this color contrast, they are showing most attractive skirts. One of them cut on straight lines has inserts of the white flannel placed at intervals around the skirt, while groups

of three tiny tabs or grosgrain ribbon are placed in broken line down each insert.

On another straight-cut white flannel, square pockets with flap turnover are used, the flap stitched in black silk floss in stripe effect. The same stitching continues down the entire length of the skirt and the width of the pocket, on golf lap tucks, giving the effect of a panel front.

Machine embroidery closely resembling braid is placed at intervals only around the border of another white flannel, and the novelty cut pockets have extremely narrow binding. The pearl button on the skirt is sewed on with black silk thread, to carry out to the letter the black and white contrast, while the buttonhole is black bound also.

Use Chain Stich in Darning.

Do not use darning stitches when the heels of your stockings become thin at the line of the top of your low shoes. Use a spool of silk and make parallel lines of fine chain stitches.

This matches the stocking mesh so well that it can scarcely be detected.

VEILS ARE OF THREE TYPES

One Has Small Dots of Dainty Pattern; Another a Spanish Novelty; for Draping.

Three types of veils, aside from the ordinary veil, have recently been contesting for popular favor. This is most noticeable in the exclusive shops which sponsor these three: the lace chantilly, the chenille dotted veil and the embroidered effects in the square or fancy shapes, preferably the square. One of the veils has very small dots in a dainty pattern and a one-row border of larger dots which is carried lengthwise around the veil as well as on the ends. Very heavy lace is also found as a medium for a long, narrow model. This veil is for draping around the crown of a hat and hanging in long ends at the back.

A Spanish novelty which is used on a hat having a wired half circle of lace in black is a veil of large fillet mesh with a woven design all over. It is used full across the back of the hat and hangs slightly below the shoulder.

back a season and still not take, but when the time comes and the people are really ready, then they have their turn. It seems as if this were the case with the three-piece suit, says Women's Wear. To describe the three-piece suit accurately, this costume consists of a one-piece dress, which counts for two pieces, and a suit jacket which makes the third. Those that are being shown early are made entirely from the material, but later on they will have silk waists which are cooler for summer wear.

Keep in Wave.

To keep the hair in curl or wave even when hot from dancing use a little gum arable when dressing the hair. Dissolve a small piece in hot water; dilute until it is quite weak. Damp the hair with this gum water, and then put into pins for an hour or two. The hair will keep curly for some time.

Three-Piece Suits.

A style that is practical may be introduced and not take; it may come

BIRDS ON NEW SPRING HATS

"Birds for spring" is the slogan of many women who are assembling their millinery for the coming season. The chapeau here shown crowns the head of a well-known motion-picture actress. A light gray suit of whipcord sets off the hat.

The skirts, and with other variations. But there is that simple, unadorned little model that is cut from one piece of the material, has tightly-fitting little chopped-off sleeves, and is nothing less than a handsome bit of material cut to fit the figure in the easiest possible way.

Some of these dresses are still made of handsome brocades. Others of them are embroidered almost entirely over their surfaces; others are made of heavy black satin, to be worn with a cape to match, or of tweed or homespun having capes to go with them. There is no use trying to deny the fact that the one-piece dress is still good for those figures which can wear it well, though not every woman is so blessed, and some of them are compelled to have extra fullness put into places so that the frock may be at all becoming.

Coats made over this simple one-piece model have achieved a certain success through the winter, and they bid fair to hold a place in the spring fashions. Usually they are provided with wide open sleeves that flop about the arms and hands, and add to the general picturesqueness of the effect that this loose model is bound to give.

For negligees and house gowns (and even for night robes) the one-piece model has no rival. It is something holding good in such a way that one suspects it will be an eternal factor in the matter of women's attire. The simplicity of the cut and the way in which the thing can be made so easily are much in its favor; but, after all, the appearance of the model is what recommends it most particularly to women. It is adapted to special uses in many respects, and it is for that reason it has kept its popularity through so many changes.

Velvet Frocks.

A new black velvet frock recently noted was made on the long slim lines and trimmed with tarnished steel. The sleeves were wide at the wrist and were embroidered with the steel. There were side panels which fell below the lower edge of the skirt.

TOWNSEND

Clifford Clark made a business trip to Wilmington on Monday.

John Bender, of Port Penn, visited friends here on Monday.

Harry Riley, of Smyrna, was a visitor in town on Tuesday.

J. Wright Garton, of Denton, Md., has been visiting James H. Garton.

H. P. Dukes, of Aberdeen, Md., called upon friends in town Wednesday.

George M. Wilson, of Middletown, visited W. P. Wilson and wife on Sunday.

D. C. Bell and wife, of Smyrna, were Sunday visitors at the home of D. N. Hart and wife.

Frederick B. Meade and wife, of New York City, are guests of T. B. Schatzka and wife.

Mrs. Daisy Johnson attended the funeral of John Ellis at Smyrna, on Saturday afternoon.

Oscar Humes, of Bridgeton, N. J., has been paying a visit to James H. Garton and Miss Bell Garton.

Elwood Rheims and wife, of Bear Station, spent Monday and Tuesday with relatives and friends here.

Austin Hart and wife were week-end visitors in Baltimore, Md., being entertained at the home of B. H. Taylor and wife.

Mrs. S. A. Collins wishes to announce that during her husband's absence, the undertaking business is being continued, having engaged experienced hands for this purpose.

Shad fishermen, according to local fish dealers, are now preparing their nets to cast overboard the last of the present month if the weather continues favorable for an early run.

J. Wilmer Fennimore and wife are receiving congratulations on the birth of a son, which happy event occurred on Monday morning. The infant has been named J. Wilmer, Jr.

Price Lattonius and wife, Mrs. Winibottom, Miss Marion McCoy, of Philadelphia, and Mrs. Kate Johnson, of Bowers Beach, spent Saturday with Mrs. Edna Wiggin on Railroad Avenue.

Mrs. S. A. Collins paid a visit to her husband, who is a patient at the Jefferson Hospital, Philadelphia, and reports that his condition is steadily improving, which fact is very gratifying to his many friends.

"The Deacon," a five-act comedy-drama will be presented at Oak Hill School, Thursday evening, March 23. This play is full of humorous incidents and ludicrous situations and has much farcical business.

A severe storm resembling a cloud-burst visited this section on Tuesday afternoon and much damage was done to trees by the terrific gale that accompanied the downpour. In some parts of the town, cellars were flooded.

The appointment of J. Clarence Hutchison of this place, to be postmaster, has been confirmed and Mr. Hutchison will assume his duties just as soon as his commission arrives, which is expected to be sent here within a few days.

ADVERTISING orders which occupy the Hart building, are being painted, also the walls are caulked, and the room is to be thoroughly refurnished. The lodges aim to make their headquarters one of the most attractive and comfortable meeting places for secret orders in the State.

Quite a few changes took place among the residents of this locality on moving day, March 1st. Mr. and Mrs. J. C. Hutchison moved to the home vacated by Mr. Herman VanHorn and family; Mr. Minors Banning, of Middletown, removed to the property of the late Margaret Ginn, who recently purchased it. Mr. Ginn removed to a farm, near Chesapeake City, Md., and Eugene Savin moved to the farm vacated by Mr. Ginn, having come from a farm near Farnhurst. Mr. Schenck, who recently bought the J. Clarence Hutchison farm, has moved to his new abode.

The death of John Ellis, a retired farmer, occurred near Smyrna on Thursday of last week, and his funeral was attended by quite a number of friends of the deceased from this locality. Mr. Ellis, who was 71 years of age, died of general debility after a six months' illness. Mr. Ellis is remembered here as having conducted the "D. W. Corbit farm," near Stump Corner, near Odessa, for several years, and gained many friends owing to his sunny disposition and kindly acts in behalf of others. Interment Saturday afternoon at 2 o'clock in Odd Fellows' Cemetery. Lester Daniels had charge of the burial.

About the most cheering news received in this locality for a long time, was received by phone at 7 o'clock on Tuesday morning when Mr. George M. Wright, of the widely-known firm of Wright Canning Co., told his representative here to announce to the local farmers that it had been decided to operate the large cannery in Townsend to its full capacity the coming season, and that he, Mr. Wright, would be in Townsend the latter part of the week to contract for both corn and tomatoes at a good price. The announcement is but another proof of the prediction of business men and others, generally, that the greatest prosperity experienced in this country for years, if ever before equaled, is soon to be realized, due mainly to the control of the Harding Administration.

The Townsend for hunting club held another exciting hunt on Friday morning, the day's sport beginning at 10 o'clock and was not concluded until sometime after darkness in the evening. Sir Edmund was liberated from a narrow necked location of Bl Tower, just south of the town, and it quickly bounded off in a western direction for two miles, when it ran in a southwest direction, soon turning again, thence heading toward the east, and at one o'clock the fox went to earth near Brick Store Landing, near Smyrna. Shortly afterward the hounds struck the trail of another fox near Shadding Point, and after several hours chase it went to earth on the Derrickson farm near the tent. Among the hunters were: Paul B. Messick, Ernest Whitington, N. W. VanHorn, Hart Scott, Tinley Scott, J. Corbit Reynolds, Ran-

dolph Reynolds, William Reynolds, Dallas N. Hart, Thomas McWhorter, Harold Reynolds, Edward Ratledge, George Ford and Clifton Clark.

New Pool Room

I wish to inform the public that I will open an up-to-date Pool Room, on the second floor of the American Stores Building, on North Broad Street. Full line of Cigars and Cigarettes. Call and inspect my new quarters.

WILLIAM E. ROBINSON, Middletown, Del.

LARGE Cattle Sale

An Unusual Opportunity

WEDNESDAY, MARCH 15, 1922

At 10:30 o'clock, Sharp on "Brady Farm," where I now reside, on Levels, between Warwick, Md., and Townsend, Del.

An accredited herd, 60 head Pure-bred and Grade Holstein Cattle, all in the prime of life, and all raised on this Farm. For the year 1920 I delivered to the Townsend Milk Station 203395 lbs. of milk from 25 cows or an average of better than 9000 lbs. per cow for the year.

For the year 1921 I delivered 236515 lbs. of milk from 25 cows or an average of better than 9000 lbs. per cow for the year.

—HERD SIREs—

Sir Inka Prilly, Sirge Burma No. 303802 a 3½ lb. son of Sir Inka Prilly Segis, the noted Winterthur Farm sire.

J. Fishkill Colantha, Sir Inka Tapay No. 334855 a 40 lb. son of Dutchland Colantha Sir Inka, that great Bull that heads the noted Morganthau herd, and who has more 30 lb. daughters than any other living sire.

Come look these cattle over before the sale, see them milked, select the ones you want, and on March 15th come back and buy them, you can't go wrong.

Every animal will positively be sold for the high dollar, a health certificate goes with every animal over six months of age with the usual 60 day retest privilege.

TERMS—Nine Months note with approved endorser, no stock to be removed until terms are complied with.

JEHU ALFREE, Townsend, Delaware. GEO. W. BAXTER, Auctioneer. Dinner will be served on Farm.

Found a Cure for Indigestion

"I use Chamberlin's Stomach and Liver Tablets for indigestion and find they suit my case better than any dyspepsia remedy I have ever tried and I have used many different medicines. I am nearly fifty-one years of age and have suffered a great deal from indigestion. I can eat almost anything I want to, now," writes George W. Emory, Rock Mills, Ala. These tablets contain no pepsin but strengthen the stomach and enable it to digest the food naturally.

H. D. HOWELL, Middletown, Delaware.
